

Private & Confidential

19 May 2022

Prime Minister Scott Morrison
Hon Anthony Albanese MP
Mr Craig Kelly MP
Mr Clive Palmer
Senator Pauline Hanson
Mr Campbell Newman

Dear Prime Minister, Party Leaders and Senators

On 22 May 2022, the unelected World Health Organisation (WHO) and World Health Assembly (WHA) will be conducting an incredibly significant meeting. The meeting is monumental because the WHO's and WHA's intentions are to take control of each country's health system under the guise of a global pandemic treaty. This gives the WHO and The World Economic Forum (WEF) incredible powers to decide health decisions and guidelines for sovereign countries. PM Scott Morrison has failed to involve Australians and include this issue in the election campaign. The Prime Minister is willfully trampling on every Australian's democratic rights.

The WHO, WHA and WEF are private institutions who have NOT been elected by individuals in Australia. The WHO, WHA and WEF are attempting to legitimise their power and seize all nations and individual rights in favour of a nondebatable, 'one size fits all' approach to governing health, currency, finance, agriculture, manufacturing, mining, energy, parenting, education, business, religion and economics.

Signing the proposed WHO Pandemic Treaty represents an act of treason. It is unacceptable and unlawful for the Australian government or an unelected bureaucracy to determine and hand over our medical and health system to unelected organisations.

We remind each one of you that Australia is a representative democracy, where those voted by Australians to govern Australia represent our interests and work for the Australian people. What is best for Australia, is not to enter into unlawful deals with international corporations.

Signing such a treaty contravenes our constitution and under no circumstances are the UN, WHO, WHA, WTO or WEF to interfere in Australia's health and economic plans. We have big, beautiful brains in this country and as we have done so in the past, are more than equipped to handle our own problems and solutions. We reject the signing of this treaty. Such a commitment must be put to the people and decided by the people and not by bureaucrats or politicians who have demonstrated they care more for power than for the wellbeing and prosperity of this great country and its people.

CMN who represents thousands of medical practitioners, health professionals, medical scientists and other Australians, submitted a response to the WHO. We now share the network's response with each of you.

CMN's Response to WHO's Proposed Pandemic Treaty.

1. All health and emergency decisions need to stay in Australia and be decided by Australians and all recommendations and limitations to rights in an emergency shall conform to the requirements set in the Siracusa Principles.
2. A treaty such as a pandemic treaty is to be developed in Australia, by Australians and for Australians.
3. The WHO is a corporate body with absolutely no power over a nation's sovereignty and laws.
4. WHO will make readily available the Siracusa Principles and promote them in each country with all guidance documents.
5. WHO shall not exaggerate the seriousness of the diagnosis, complicate treatment, promote one approach or artificially create alarm situations in response to spurious interests. If found guilty the member states agree to permanently stop all funding and relationships with the WHO.
6. Member states require the WHO to agree to be liable if injuries and damages arises from the use of any of its guidelines.
7. To prevent oppression and imbalance of power the centralisation of national data, AI, Big Tech, Big Pharma, other conflicted corporations, government bureaucracy and media poses an international security threat and must be prevented at all costs.
8. Scientific process requires time, debate and dialogue. Therefore, persecution and censorship of diversity of opinion regarding WHO's "evolving science" is expressly prohibited. Free and open discourse shall be protected and encouraged in the public's interest to prevent imbalance of power and systematic violations of human rights.
9. No treaty can be binding which confers upon the WHO the power to issue or enforce pandemic guidance which may supplant the nation's constitution, written definitions, and sovereign legislation.
10. The WHO must immediately declare all annual funders and key stakeholders with full transparency and allow for all member nations to have independent, transparent and inclusive oversight with the ability to immediately remove all conflicts of interest.

We look forward to your response.

Yours sincerely
COVID MEDICAL NETWORK
