

Dear Ms Coker MP

My name is Kerryn Bennett. I live in Corangamite electorate.

I am one of your constituents so my voice should matter to you.

As a leader of this country, you have the chance to do the right thing and speak on behalf of the people...YOUR people!

We are all Australians, we have hopes and dreams for ourselves and our children. PLEASE, think from your heart and don't let fear make decisions for you.

I have a very simple message...

I am 100% against any form of vaccination certificate or passport. I will be following your votes and commentary very closely over the next few months.

If you do not try to uphold my basic Human Rights, you will lose my vote...that is a promise! During 2020/21, I have been slowly losing my Human Rights and I won't stand for it any longer.

Never before have Australians been so eager to participate in politics. Your actions are being closely monitored and when I'm at the ballot box, I will know exactly who is on my side and who is against me.

Whether you use the word 'passport' or 'certificate' makes absolutely no difference. The idea of restricting my basic Human Rights if I choose to not to take a medication that is not fully approved by the TGA is absurd.

Even if I decided to get the COVID vaccine, I wholeheartedly disagree with restricting others who don't want it.

The reasons to not want the current vaccine options are getting more obvious by the day. I am sorry but I am choosing to say 'NO' to these vaccines not only because I am at risk with an autoimmune disorder, the construction and ingredients of the vaccine and adverse events reveal that the benefit do not outweigh the risks. Why should I risk an adverse event from a vaccine when it is less likely that I will be anything more than asymptomatic, like any other flu.

Scott Morrison assured us this vaccine would be VOLUNTARY but all the coercion and manipulation I've been seeing tells a very different story.

Regarding my right to choose my healthcare options. I am angry that you as a collective in the Labor and Liberal Parties have decided to remove Ivermectin (with Doxycyclin, Zinc), Hydroxychloroquine, or Fluvoxamine. In particular Ivermectin, which has proven results globally exhibited in real world evidence. There are too many studies to back up this evidence. I review every report that comes in via the transparent research review site www.trialsitenews.com

Our very own Professor Thomas Borody came up with the Triple Therapy Ivermectin and has been vilified for it, he is a foremost and respected gastroenterologist worldwide. I personally have had to deal with Helicobacter Pylori and his triple therapy to get rid of this deadly bacteria is second to none. In short it works! I trust his judgment! So do many other developing nations who are very thankful for Ivermectin protocols espoused by Prof Borody and the Frontline Critical Care Alliance in the US and abroad.

The FLCCC is having the same problem as the Covid Medical Network here in Australia in being heard by the WHO and their procedures for 'emergency authorised use' versus safe known real world evidence options for repurposed medicine has gone completely out the window.

The TGA had no right to duckshove safe and efficacious treatment options in favour of an unsubstantiated slew of vaccines under a 'provisional' or 'emergency authorisation use'. We were not in safe hands by these health bureaucrats, or the politicians that backed them and again this has been duly noted.

What you are telling Australians is to place themselves in harm's way with a vaccine that has a protein spike that has the potential to cause as much damage as the actual virus and many scientists attest to this fundamental flaw with these vaccines, Rather we could use a prophylaxis of Ivermectin which is safe and kills virus quickly which would suffice until a safer more efficacious vaccine becomes available.

Lastly you are telling us by enforcing a certificate or passport that we cannot live our lives freely, enjoy travel that we must risk our lives to do so. All behest of a virus that may well be contagious but is NOT virulent or cause more than asymptomatic responses for most of us.
WRONG ON SO MANY LEVELS!

The freedom and future of our country depends on YOUR actions.
Our fate is in YOUR hands. I hope you do the right thing.

I appreciate your time in responding to my question.

Kind Regards,

Kerryn Bennett
